## Facility Orientation - Review

---

In order to commence shop work this year we need to review the facility (shop) surroundings and you will be required to label an overhead view of the autoshop. Through this assignment you will review where safety equipment is kept, where specific rooms are. In addition, you will also review where items (tools, fasteners, consumables, etc.) are where they are to be returned when you are finished with them. Just like last year, everything in the shop has a specific location where it is kept.

The following is a list of items that you must include on your shop map. You have the option of labeling each item, or using an index that will match each item. For example, you can either label the drill press with a "E" or write "Drill Press". Neatness and accuracy count.

<b>A. Exit doors - 2</b>	O. Trouble Lights, Extension Cords	CC. Battery Charging Area	QQ. Rag Box
B. Teacher Office	P. Creeper Boards	DD. Funnels	RR. Used Rag Container
